PHASE III ANTENNAS HIGH END DECK HARDWARE MEETS PERFORMANCE

Designed to endure the harsh environment and communication requirements of commercial, law enforcement and disaster management applications, the Phase III antennas meet the needs of even the most serious offshore anglers.

Phase III antennas are backed by an industry-leading 8 year warranty to give you the peace of mind that no other antenna will last longer. Whether you install it on a vessel, base station, or a stationary platform, these antennas provide a host of mounting options to fit your need. And with their SO-239 quick connecting feature, simply install and stow away your antenna without the hassle of twisting or re-installing cables.

Always stay connected with maximum performance and quality.
